

## TELN 1217 Keypad/Control Module 10-Key Miniature

*Designed for use in custom automotive products as a switching control station*

Description	Specifications
<p>This touchpad switch control and status indicator provides primary control over any output modules attached to the Neuron® network. It is designed for use in custom automotive products as a switching control station in the driver's compartment or any place a miniature keyboard would be desirable.</p>	<ul style="list-style-type: none"><li>• Voltage: 7.5V -15V DC Expanded voltage available</li><li>• Operating temperature: -40° C to +85° C</li></ul>
<p>The status LEDs indicate load state and condition. One small gauge multiconductor cable connects communications between the modules. Two single conductors provide module power and separate backlighting control.</p>	<b>Interface Information</b>
	<ul style="list-style-type: none"><li>• Direct connect</li><li>• 78K Transformer coupled</li><li>• 1250K Transformer coupled</li><li>• Termination available in 0.2" termination or in Techlon Interface Standard</li></ul>
	<b>Dimensions</b>
	4.375" w x 1.875" h

**Simple. Sensible. Smart.**
